For plastic pipe systems the necessary harmonised European Standards (hENs), which allow their CE marking, have not been published yet. This means that it is currently totally illegal to issue a DoP or to apply CE marking to any plastic pipe or fitting unless in very specific cases they are covered by an EAD. This concerns any of the following, end-use applications: - Non-pressure soil and waste discharge, - Underground non-pressure drainage and sewerage, - Buried and above ground conveyance of liquids under pressure, - Hot and cold water distribution.
